

VCIP 2012 Special Sessions call for proposals

Special sessions supplement the regular program for VCIP 2012. They are intended to cover new and emerging topics in the fields of visual communications and image processing. Each special session provides an overview of the state-of-the-art and highlight important research directions in a field of special interest to VCIP participants. It will be a focused effort. Potential topics include, but not limited to,

- Compressive Sensing
- 3D TV
- RGB-D Cameras (recognition, modeling, rendering, compression, etc.)
- Augmented Reality
- Visual Knowledge Transfer across Heterogeneous Camcorders
- etc

Please submit your proposals before **March 15, 2012** to **Special Session Chairs:**

Mark Liao (liao@iis.sinica.edu.tw), Academia Sinica, Taiwan

Toshiaki Fujii (fujii@nuee.nagoya-u.ac.jp), Nagoya University, Japan

Paper Submissions:

Please follow the instruction of main conference paper submission to submit the papers to the special sessions. In the submission system, you need to answer the option below properly.

“If the paper is submitted to a special session, please select one of the special sessions.”
